

AF-TA Sky KCC-S6

Little brother of TA Skytower

High-class mounting and individual design are identifying features of KOMTECH. Features which you can find also at this desk connector panel.

Sky KCC-S6 is for embedding into the table. The cover can be fold-in inside of the connector panel.

In closed status the Sky KCC-S6 has a three-sided cable output.

You have the choice between following cable connectors:

- solderable
- pluggable
- with convert cables

In function and application there are multifaceted possibilities. But the clou is the fantastic cable solution inside the table.

The Sky KCC-S6 is individual mountable. Our sales team will also be pleased to offer personal assistance. Or create it on your own! - With our *WinPlan2* software, which you can find on www.komtech.de/downloads.

Also design and construction leaves hardly nothing to be desired in customers request. Choose between:

- Aluminium HQ Structure with Superb Resistance Eloxal
- Anodized black
- Liquid painted in RAL colour
- Further possibilities on request!
