

**Design Line - motorisches Tischanschlussfeld**

The Design Line is fascinating with an elegant look, which presents the fastening of the connectors in an invisible way.

**modern**

With the Design Line modern equipment will be a part of your bureau and conference rooms. The user-friendly system and individual connectors with latest technology guarantee an easy understanding for employees and visitors.

**flexible**

As like all connector panels, KOMTECH offers maximum individuality with this connector panel. The mounting (2x power, 2x LAN, HDMI, VGA/Audio, DisplayPort, USB) leaves nothing to be desired and complies with all requirements in a modern conference room.

**easy to handle**

Unused all connectors stay in their upside down position. That creates an organised appearance and the total table surface is available for the users work.

By pushing the green arrow, the connector panel turns from the rest position to the table surface. Integrated sensors detect the using and prevents the unwanted closing. If all connectors have been removed, the connector panel could turn back into rest position via pushing the red arrow. Now it locks to a flat surface. Is the connector panel unused for a while it closed automatically.
